PROFILE

I'm Joseph Mulwa, a passionate Fullstack Developer and DevOps Engineer with a strong foundation in the MERN stack and cloud-native technologies. I love architecting scalable systems, automating deployments, and crafting beautiful user experiences. When I'm not coding, I'm exploring new technologies and trying to come up with ideas that technologically solve day to day problems.

EXPERIENCE

Software Development Attachee

Feb 2026 — May 2026

Makueni Tech and Innovation Hub

Currently undertaking industrial attachment as part of my Computer Science degree program, gaining hands-on experience in modern web development and DevOps practices. Developed responsive frontend web applications using modern frameworks and libraries Integrated and consumed RESTful APIs for dynamic data handling and real-time updates Implemented automated deployment workflows using CI/CD pipelines for efficient software delivery Collaborated with cross-functional teams to deliver production-ready solutions Gained practical experience in agile development methodologies and version control systems

EDUCATION

Diploma — Computer Science

Oct 2024 — Dec 2026

Cooperative University Of Kenya

Gained Knowledge on Architecting distributed systems, databases, and APIs at scale. Designing scalable, reliable, and efficient software architectures for complex applications. Efficient schemas, query optimization, and caching strategies

Certificate — Web Design

Jan 2024 — May 2024

East Tech Computer College

Gained the basic knowledge on web design using HTML, CSS and javascript. Gained skills in Optimizing load times, Core Web Vitals, and rendering strategies.

ACHIEVEMENTS

- Gained a certificate For participating in Basic Digital literacy for MSMES
